

Zscaler Partnership

# Enterprise Data Security Powered by Zscaler

Securing people, processes, and technology with advanced data protection

## Legacy security systems are falling short

As organizations distribute large volumes of data across both cloud and on-premises environments, unified security becomes increasingly more challenging. Legacy systems often lack the visibility and controls required to safeguard sensitive information, while risks such as accidental disclosures, insider threats, ransomware, and social engineering continue to evolve. Impacts extend far beyond immediate financial losses and penalties. Longer-term outcomes – including erosion of customer trust, reputational damage, legal claims, and operational disruptions – can drag on for months or years. Modern enterprises must embrace comprehensive and adaptable data security solutions that can effectively address demanding cloud, on-premises, and hybrid infrastructure requirements.

### Zscaler DLP Results

- 38% of MITRE ATTACK techniques mitigated
- €570k annual security benefits<sup>1</sup>
- 60% reduction in mean time to respond

## Scalable data loss prevention solutions for modern enterprises

Wipro's data security strategy integrates people, processes, and technologies to deliver scalable data protection solutions built on strong policy and governance foundations. We start by compiling a detailed understanding of an organization's data landscape, including where data resides, how it flows, who accesses it, and how sensitive it is. We then define robust security policies aligned with compliance mandates. Leveraging Zscaler data loss prevention (DLP) solutions, Wipro automates monitoring and customizes security controls to safeguard complex business processes.

To sustain ongoing effectiveness, the strategy incorporates constant improvement through user training, continuous monitoring, stakeholder engagement, and the establishment of a resilient governance framework that promotes a security culture throughout the organization. This comprehensive methodology empowers companies to proactively manage data security and respond swiftly and effectively to emerging threats.

### Workflow Automation

Comprehensive remediation with native ITSM integrations

### Unified Dashboard & Policy

Centralized view for risk monitoring and policy enforcement

### Workflow Automation

Out-of-Band Controls (DSPM)

Posture Management   Access Governance   Compliance Management

### Inline Controls (DLP)

Prevent loss across all channels

# Wipro's end-to-end data loss prevention program strategy

Our AI-powered, policy- and governance-first approach to data loss prevention integrates people, processes, and technologies to deliver scalable and adaptive protection across cloud, on-premises, and hybrid environments. Our solutions unify data discovery, policy design and enforcement, and continuous risk governance to address visibility, security, and compliance gaps, reducing operational risk while enabling the business to scale securely.

## Measurable business outcomes

- Strengthens protection of sensitive data**, significantly reducing the risk of accidental or intentional data leakage.
- Enhances regulatory compliance**, lowering legal exposure and financial liability across jurisdictions.
- Improves operational efficiency through automation**, enabling security teams to focus on higher-value, strategic initiatives.
- Enables continuous, real-time threat monitoring**, supporting proactive risk identification and response.
- Continuously optimizes policies and controls**, adapting to evolving threat landscapes and changing business needs.
- Builds a security-conscious culture** through comprehensive user awareness and targeted training.

## Connect with us to get started

To learn how Wipro's AI-powered, policy- and governance-first data loss prevention program can help safeguard your most sensitive information, connect with a Wipro Cybersecurist: [Wipro.com/cybersecurity-experts/](https://wipro.com/cybersecurity-experts/)

### Wipro: Cybersecurity by Cybersecurists

Wipro, a leading technology services and consulting company, provides cybersecurity expertise to the world's leading organizations. Our strategy-first model, Wipro CyberTransform,<sup>SM</sup> optimizes today's enterprise journey to the cloud and modernizes identity and security programs through a risk lens and expert compliance knowledge. Wipro CyberShield,<sup>SM</sup> defends business operations by providing on-demand cyber resilience management in an as-a service model at scale. We secure the modern enterprise by transforming risk into opportunity with solutions that increase business agility and create a competitive advantage for our clients. To learn more, visit [wipro.com/cybersecurity](https://wipro.com/cybersecurity).
