

More time for what matters most

How Dell AI PCs with Microsoft Copilot Help Small Businesses Grow Faster.

What you'll learn: How Dell devices with Copilot+ PC help small business owners reclaim time from routine tasks, stay protected without an IT department, and grow with a technology partner built for exactly this stage of business.

Copilot+ PC

8:00 AM

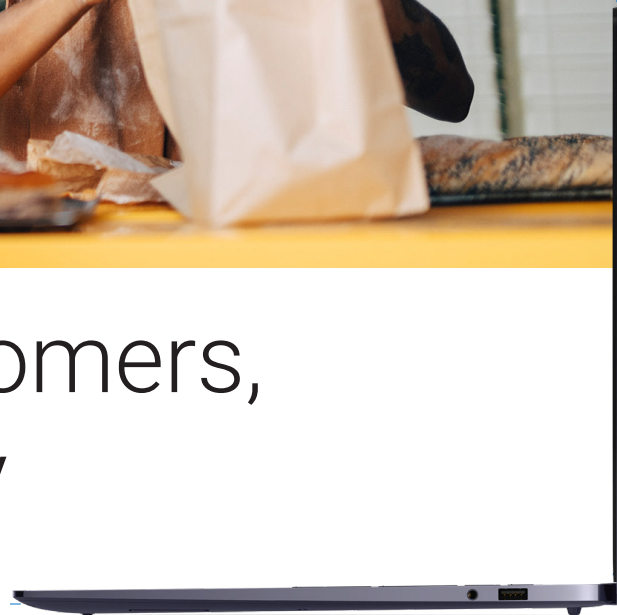

10:00 AM

1:00 PM

5:00 PM

Focus on your customers, not your technology

Emails, messages, meeting notes, spreadsheet data, task lists: your plate is always full. But not everything on your plate is your highest priority work.

So, how do you spend less time on routine tasks and more time on work that moves business forward? Dell devices with Windows 11 Pro and Copilot+ PC help you get more done every day, like having your own personal AI assistant built right into your computer, making it easier for business to run reliably, stay protected and grow on your terms. No dedicated IT department? No problem. Here's what that looks like across a real workday.

What will this look like for you?

Let's take a look at the real everyday moments where Dell and Microsoft Copilot can help you achieve more, faster.

8:00am

Hit the ground running

Imagine starting your day knowing exactly what's important, what's not and what actually needs your attention. Instead of scrolling through an overwhelming inbox, you can speed up routine tasks automatically. No wasted time, just a seamless start to your day.

Summarize your inbox in seconds

10s, 100s, even 1000s of unread emails? No problem. Microsoft 365 Copilot in Outlook can summarize them for you, listing key points that make catching up easy.

Keep projects moving

You never have to be the bottleneck again. Microsoft 365 Copilot in Outlook makes replying to email fast, creating drafts and automated responses tailored to your intent and tone preferences.

Protect your time

Based on your calendar and deadlines, Microsoft 365 Copilot Chat can block off focus time on your calendar, ensuring you have time to dig into more strategic work.

Pick up where you left off

Recall instantly brings up the documents, websites and apps you were working on yesterday, so you can jump back in without wasting time.

10:00am

Reduce task overload for added impact

When your technology is fast, easy to use and designed around how you actually work, you can get more done every day. Dell devices with Copilot+ PC help automate daily to-dos so you can focus on the higher-impact, bigger picture tasks.

Find your files fast

No need to waste time searching. Describe what you're looking for and improved Windows search¹ instantly locates your documents, photos, presentations and other files, including those shared previously by your teammates.

Protect your privacy

What happens in your business, stays in your business. Protected by enterprise-grade security, Microsoft Copilot Chat answers questions, generates content and ideas and finds information without exposing your chat information to the public.

Unlock new insights

Turn workbooks of data into usable insights. Ask Microsoft Copilot questions about your Excel data and Microsoft Copilot shows insights as charts, Pivot Tables, summaries, trends or outliers.

Tackle creative work faster

AI tools in Photos and Paint help you refine images and generate new ideas quickly, turning simple assets into high-quality visuals whether for social posts or highstakes presentations.

Save on energy costs

World's #1 monitors for 12 years². Up to 33% less power use than previous generations³

1:00PM

Turn any space into your office

Some days, work gets done in a waiting room. Or a coffee shop. Or in the school pickup line. You don't have time for outages or slow performance. And you don't have time to troubleshoot. You need technology that just works. Dell devices with Copilot+ PC are designed to keep up with the demands of your day while working on the go.

Meet anywhere

Windows Studio Effects⁴ automatically adjusts your lighting, blurs your background and suppresses noise so you look and sound professional no matter where work finds you.

Unplug to plug in

Stay plugged into the meeting, not the wall. Long-lasting battery life gives you the freedom to work without worry of a shutdown.

Lock into conversation

Microsoft Copilot in Teams takes notes and suggests action items so you never have to break focus. Send meeting recaps, including what questions were asked, what was answered and what still needs resolving.

Sound professional *(even from noisy coffee shops)*

(Open Office category)

5:00PM

Put away the infinite workday

Sign off knowing exactly where you're going to start tomorrow. With an organized to-do list of action items that will generate the biggest impact, you don't have to spend 30 minutes digging through meeting notes trying to recall already-forgotten details. You're ready to hit the ground running again tomorrow.

Know what's next

Click To Do⁷ turns meeting notes and on-screen content into tasks, summaries and follow-ups across Teams and Excel.

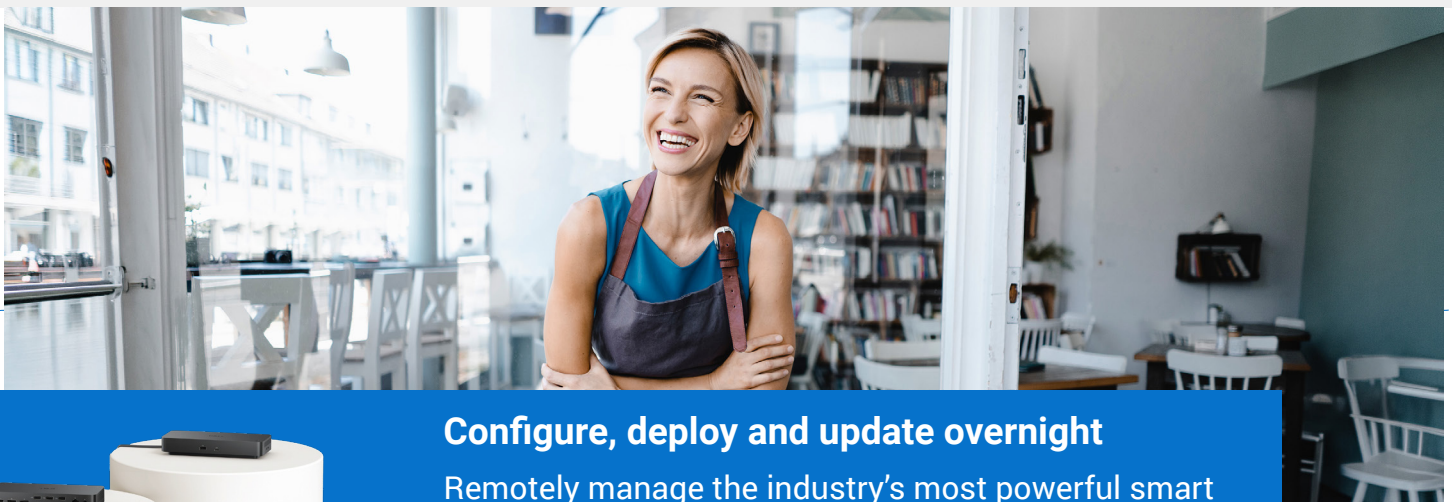

Prep for tomorrow

Use Voice Access to open Outlook and review your schedule, hands-free. Forgot to set up a meeting? Microsoft Copilot in Outlook can find available times for all attendees and help organize your meetings and appointments.

Power down with confidence

With smart sorting and custom folders, Microsoft 365 Copilot in Outlook keeps you organized even when you're offline. When you're ready to check email again, you can easily find what's important without searching.

Configure, deploy and update overnight

Remotely manage the industry's most powerful smart docks⁶ without end-user presence from the Dell Device Management Console.

Run reliably, stay protected, grow on your terms

With smart, fast devices, built-in security and flexible services, Dell ensures you can spend less time on technology and more time on what matters most.

Productivity Technology that works for you

Modern workplaces demand devices that keep up with rich collaboration and heavy multitasking. Dell delivers reliable, powerful devices designed around how your team actually works: fast enough for today's demanding apps, smart enough to speed up routine tasks automatically and tough enough to keep going day after day.

AI-ready devices work right out of the box, so you can work faster, focus more and waste less time waiting on slow systems.

Security & Manageability Protection you can trust

Your data, your cash flow, and your reputation are on the line every day. Dell builds security into your device, not onto it. Secure suppliers, hardware protections, credential safeguards, and smart threat detection are built into every Dell PC, giving you a stronger foundation from the first boot, no dedicated security team required.

Assurance Easy to own from Day 1 and for years to come

Dell makes your PCs easy to own, from setup to day-to-day support to a seamless refresh. You spend less time on technology and IT and more time on your business and your customers. With simple, dependable services built around your PCs, you reduce disruption, avoid unexpected costs and stay confident your devices will power your business for years to come.
