

Focus on your customers, not your technology

Windows 11

A day in the life using Dell devices with Copilot+ PC

Imagine having your own personal AI assistant built right into your computer to help with routine tasks. How much more impact could you have every day? With Dell devices with Copilot+ PC, you don't have to imagine. Take a look at how Dell devices with Copilot+ PC make it easier for your business to run reliably, stay protected and grow on your terms.

MORNING

Hit the ground running

Prioritize what's important

Microsoft 365 Copilot in Outlook summarizes your inbox in seconds.

Microsoft 365 Copilot Chat can block off focus time on your calendar.

Pick up where you left off

Improved Windows Search instantly locates the files you need for the day: documents, photos, presentations and more.

Ask **Microsoft 365 Copilot in Excel** questions about your data, and it will show insights as charts, Pivot Tables, summaries, trends or outliers.

As you work

Use **Microsoft 365 Copilot Chat** to answer questions, generate content and ideas and find information. Your chat information is protected by enterprise-grade security, so what happens in your business stays in your business.

AFTERNOON

Work from anywhere

Easily keep up with demands while working on the go

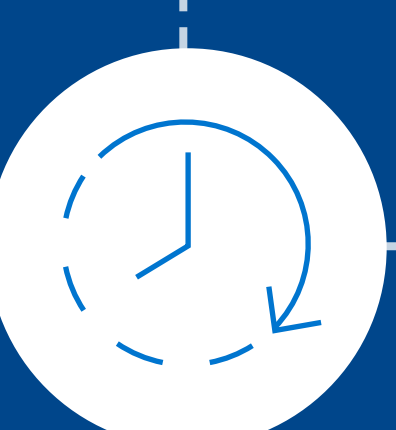

During meetings

Whether you're meeting from a waiting room, a coffee shop or the school pickup line, **Windows Studio Effects**¹ automatically adjusts your lighting, blurs your background and suppresses noise so you look and sound professional.

Microsoft Copilot in Teams takes notes and suggests action items so you never have to break focus.

Send meeting recaps, including what questions were asked, what was answered and what still needs resolving.

Prepare for tomorrow's busy day

Sign off knowing exactly where you're going to start tomorrow.

Use **Voice Access** to open Outlook and review your schedule, hands-free.

Forgot to set up a meeting?

Microsoft 365 Copilot in Outlook can find available times for all attendees and help organize your meetings and appointments.

Your inbox is kept organized even when you're offline thanks to smart sorting.

When you're ready to check email again, you can easily find what's important without searching.
